1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

2000 Analytical Review DWCCA-5130-PJL

Dear Mrs. Donskey:

The Public Service Commission has completed their analytical review of your 2000 annual report. The primary purpose of our analytical review is to detect possible accounting related errors and to identify significant fluctuations from prior year's data, which are not sufficiently explained in the footnotes of your annual report. We have no questions, only the following comment.

During our review, we noted that according to our calculations, the amount the utility reports for public fire protection service billed per Rate Schedule F-1 in Account 463 on the Other Revenues (Water) schedule, page W-4, differs from our calculation by \$1,753 (see enclosed worksheet). Because of this large discrepancy, we also checked the amount reported in the 1999 annual report and discovered a discrepancy of \$1,753 for that year as well. Please adjust your 2001 Public Fire Protection Service charge to account for the total \$3,506 undercharge from 2000 and 1999. Please follow our procedure for calculating the charge in the future.

You may consider your review closed. Thank you for your efforts in preparing your 2000 annual report. If you have any questions, please feel free to contact me at (608) 267-9198 or e-mail me at leegep@psc.state.wi.us.

Sincerely,

Peter J. Leege
